

# 1 to 1 SATA DVD Duplicator

Our new **1 to 1 SATA** duplicator allows the user to duplicate large quantities of DVD, Blu-ray or CD at speed without requiring a computer or any previous experience. The Edgedupe simply creates exact mirror images of the data on the source disc. Duplication can be made from a single master DVD or CD. With the Edgedupe, users can now duplicate on demand with no minimum quantity and retain 100% confidentiality by producing in house rather than risking using an outsourced duplication company. This is the ideal solution for data, video and audio backup. Regular firmware updates via [www.edge10.com](http://www.edge10.com) and local technical support, coupled with wide compatibility with the latest SATA optical drives the Edgedupe offers many compelling reasons to buy.

## SATA Type

## one to one

<b>Chassis Size</b>	3 Bay
